Luis Santamarina Alcain

Full Stack / Backend PHP Developer · Laravel

San Sebastián, Spain · Remote or on-site (San Sebastián)
correo.lsantamarina@gmail.com · +34 620 912 883 · LinkedIn · GitHub

PROFILE

PHP developer with 12+ years of professional experience building web applications, REST APIs and custom backends, mostly with Laravel (also Symfony and Yii/Yii2). Experienced in multi-tenant applications, system integrations and modernising legacy codebases, including full Laravel 5 → 12 migrations. Seven years at a digital agency in Stuttgart working for clients such as Mercedes-Benz Vans. Fluent in German (C1/C2).

WORK EXPERIENCE

Full Stack Developer — wegetit 10-2025 – 06-2026
San Sebastián, Spain

- Technical ownership of two existing applications of a premium meat producer: an **order management system** and its **B2B/B2C online shop**.
- **Order management system:** generates preparation and processing orders for meat products from B2B and B2C sales, including customer orders placed through the online shop.
- **Legacy migration:** full rewrite of two Laravel 5 + Backpack applications (including the corporate website of an industrial machine-tool manufacturer) to **Laravel 12 / PHP 8.2 / Backpack**, keeping complete functional parity for users.
- **Corporate website** for an industrial machining company, adapted at small scale from the website of its new parent company after an acquisition.

Laravel · Livewire · Backpack · PHP 8.2 · SQL Server · MySQL · Docker · Claude Code

Senior Developer — /conwork 10-2021 – 04-2025
Alicante, Spain

- Development of a multi-tenant Laravel API + Vue 3 application, new API services and features/bug fixes on legacy projects.
- Update of CI workflows.
- **Transport management platform:** multi-tenant Laravel API + Vue 3 app for logistics companies (trucks, trips, sales, invoices, reports) across dev, staging and production environments.
- **Concrete logistics API (Cemex):** management of concrete mixer truck services according to plant requirements (axles, volume), covering internal services and outsourcing (direct assignment to a provider or open tender in which providers pick services).
- **PDF server:** Laravel API that receives HTML and returns a base64-encoded PDF (Puppeteer/Chromium), deployed on Windows and Ubuntu.
- **GPS API:** Symfony connector to the Webfleet API that imports drivers' GPS data at intervals for working-time management and HR/sales reporting.

Laravel · stancl/tenancy · spatie/laravel-permission · dedoc/scramble · Symfony · Vue 3 · Tailwind · MySQL · MariaDB · Node.js · Puppeteer

Online Developer / Junior Developer — Weitclick GmbH / oddity 11-2012 – 02-2020
Stuttgart, Germany

- Junior Developer (2012 – 2015), promoted to Online Developer (2015 – 2020).
- Yii and Yii2 projects for industrial and consumer brands: corporate websites with custom backends, marketing campaign sites and a warranty management system.
- Clients included **Mercedes-Benz Vans, Schneider, Weleda, FEIN and Leitz**.
- Work across development, staging and production environments with Docker and Vagrant.

PHP · Yii / Yii2 · MySQL · JavaScript · jQuery · Sass · Grunt / Gulp · Docker · Vagrant · Jira
